

Safety & Emergency

KWSP
EPF

Basic Firefighting & ERP Training

Programme Aim:

This training is designed to develop participants' theoretical understanding and practical skills in Fire Emergency Response Planning and the implementation of fire drills. It aligns with legal and standard requirements, ensuring that emergency response plans are properly documented, communicated, and implemented in the workplace. The program emphasizes the protection of human lives and the minimization of property loss during fire emergencies. Through hands-on and practical approaches, participants will gain the ability to establish procedures, respond effectively to emergencies, and plan and execute fire drills with confidence.

Mode of Delivery:

Physical/Online

Duration & Total Learning Hours:

2 Days (16 Hours)

Module Structure:

1. Objectives and the Importance of Fire Emergency Response Planning
2. Legal Requirements - OSHA Act 1994, Bomba Act 1988 – Section 5 (1)(A), ISO 14001/18001
